

Tasks To Be Performed:

Use Azure CLI and Azure PowerShell to:

1. Delete all the resource groups in West US region using one command

The screenshot displays the Azure portal interface at the top, showing the 'Resource groups' page. Below the portal, a terminal window shows the execution of the following commands:

```
az group list --query "[?location=='westus']" --output json
List all resource groups located in the West US region.

https://docs.microsoft.com/en-US/cli/azure/group#az_group_list
Read more about the command in reference docs
shanaawaz [ ~ ]$ az group list --query "[?location=='westus']".name -o tsv | xargs -otl az group delete -n
az group delete -n mno
Are you sure you want to perform this operation? (y/n): y
az group delete -n abc
Are you sure you want to perform this operation? (y/n): y
az group delete -n pqr
Are you sure you want to perform this operation? (y/n): y
shanaawaz [ ~ ]$
```
