

Tasks To Be Performed:

1. Connect Azure PowerShell to your Azure account
2. Create a new resource group in South Central US with the name "rg-powershell"

Please submit the screenshot along with the commands.

The screenshot displays the Azure portal interface. The top section shows the 'Resource groups' page with a table of existing groups:

Name	Subscription	Location
New-rg	Free Trial	Central India
xyz	Free Trial	South Central US

Below this, a PowerShell terminal window is open, showing the command to create a new resource group and its successful execution:

```
VERBOSE: Authenticating to Azure ...  
VERBOSE: Building your Azure drive ...  
PS /home/shanawaz> New-AzResourceGroup -Name rg-powershell -Location southcentralus  
  
ResourceGroupName : rg-powershell  
Location           : southcentralus  
ProvisioningState  : Succeeded  
Tags               :  
ResourceId         : /subscriptions/5933e4eb-e165-4c8d-b8a9-964e1e78b238/resourceGroups/rg-powershell  
  
PS /home/shanawaz>
```

The bottom section of the screenshot shows the 'Resource groups' page again, now with three groups listed:

Name	Subscription	Location
New-rg	Free Trial	Central India
rg-powershell	Free Trial	South Central US
xyz	Free Trial	South Central US
